

My Vasundhara Campaign 2.0

On implementation in local self-government bodies in the state.

Maharashtra government

Department of Environment and Environmental Change

Governance Decree, No.: MAW A 2021/ Procurement 75/ TAN.K.1

Madame Kama Road, Huttama Rajguru Square

Ministry, Mumbai 400032

Date: 22 December, 2021

Read: (1) Governance Decisions, Environment and Environmental Change Section No.

Pr.C.134/ TANK-1, dated 14th October, 2020

(2) Governance Decisions, Environment and Environmental Change Division No.

Procedure 16/ TANK-1, dated January 21, 2021

The preface:

Based on the five elements of nature: earth, gas, water, fire, and sky.

Vasundhara Abhiyan has been launched in the State from 2nd October 2020 in the Local Self Government Institutions.

A total of 686 Local Self Governments from the State participated in the competition.

Institutions participated, including 43 cities, 222 municipal councils, 130 municipal panchayat and 291

It included Gram Panchayats.

Instead of going to the actual field to assess the state's Corona situation, Virtual Assessment was conducted of the local institutions that did the best in the desktop assessment. Based on the total scores of these two assessments, all the local organizations and officers who have won the awards of my Vasundhara campaign have been honoured at my Vasundhara Honours Ceremony on World Environment Day, 5th June 2021.

On the occasion of World Environment Day, I launched my Vasundhara Mission 2.0.

According to this, My Vasundhara Mission 2.0 has been launched by the Chief Minister.

Detailed instructions for implementation in the state's local agencies and my Vasundhara Campaign 2.0 final

The issue of releasing the toolkit was in the hands of the government.

Government decision:

Taking into account the provisions of the Resolution, the Government is approving the implementation of My Vasundhara Abhiyan 2.0 based on the five principles related to the nature of earth, gas, water, fire and sky among the 11,968 local self-government bodies listed below in the State.

Government Decision No: MAWAW 2021/ Procurement 75/ TAN.K.1

Number of local entities included

Civil Local Self-Government Institutions: 406 (Appendix-1A, (as specified in B&Q)

(1)

Cities of Amritsar

43: (Municipality 27 and Augsburg City Council 16)

(2)

City Council

226 : angel-1 (b)

Municipal Panchayat

(3)

930: Fannigist-1 (a)

(ब)

Rural Local Self-Government Authorities: 11,562 (as indicated in Table 2A and Table 2)

(4)

Gram Panchayati (01)

299: With a population of over 10 thousand (angel-2,/)

(as noted)

(4)

Gram Panchayati (02)

11,263 :10 with a population of less than ten thousand (angels-2/ in)

(as noted)

2

Under this initiative, local governments will work with Earth, gas, water, fire, and the sky.

For the Amrits group in the past to evaluate the work done on the relevant five levels:

Apart from 6000 and Amrits, 5500 points have been reserved for other groups:

25

ee

aa”

EN

»\ Guidelines of Nursery as per — Indian Council of

718 122

Agricultural Research

“ares.

Time of sowing/initiation of propagules production depend on how long the seedlings will take to have an optimum size of a seedling (with good rooting and about 20 cm tall) and coincidence of its ready availability at the time of initiation of monsoon (July for Southwest monsoon and October for Northeast monsoon areas).

The number of plants required to be produced from a nursery can be calculated as below.

e

Number of plants required for the season = W

e

Mortality in nursery = X

e

Transportation/culling loss = Y

e

Seedling required of buffer loss = Z

e

Total seedlings required to be produced from the nursery =W+X+Y+Z

In case of vegetative propagules, the success percentage also needs to be considered. Generally, it is assumed that

e

The area of nursery should be 0.25% to 2.5% of the area to be planted

or

e

The area of nursery should be about 1 acre for every 30,000 seedlings.

e

It also required daily supply of water @ 200 | per 1000 seedlings.

| ow 3... iv Ss कः

Rejuvenation and beautification the water bodies suggested measures:

1. Periodical dredging of waterbody/river/nallah/lake

2. Periodical cleaning drives via community participation

3. Identifying point sources of pollution and capturing of the same such as arresting untreated wastewater disposal.

4. Arresting solid waste disposal

5. Installation of dustbins

6. Polluter pays principle should be adopted

7. Periodic removal of water hyacinths

8. Removal of encroachments near the water bodies and beautification of the same.

9. Special attention during the religious festivals :

i. Restriction on deity submersion

ii. Restriction on flower and other organic waste disposal

85

The wells played a critical role as a source of drinking water as well as for sustaining the Indian agriculture. In urban areas also played an important role as the source of potable water, absorption of flood water and a conduit for groundwater recharge. Due to technology upgrading and urbanization, this traditional system was neglected, and many wells dried up. This indicator encourages the local bodies to revive their traditional wells and examines how efficiently the local body is doing it. Evaluation Mechanism Marks Details required for supporting progress: LJ Self-certification LJ Number of old wells within the periphery of the local project LJJ were taken on the website LJ.

4.2.3 Urban: Number of green buildings

100

A green building is one which uses less water, optimizes energy efficiency, conserves natural resources generates less waste and provides healthier spaces for occupants, as compared to a conventional building. Green building helps to reduce carbon footprint of the local body. This parameter indicates how many green buildings are existing or proposed within the periphery of the local body

4.2.3 Rural: Bio-gas plants as a source of renewable energy

100

Biogas can be produced from raw materials such as agricultural waste, manure, municipal waste, plant material, sewage, green waste or food waste. Biogas is very good source of renewable energy in rural areas. This indicator highlights how the ULBs/PRIs are using Bio-gas to reduce usage of conventional energ

Sauces.

4.2.4 Urban: Energy audit of public buildings and energy saving

efforts

An energy audit is an inspection survey and an analysis of energy flows for energy conservation in a building. It may include a process or system to reduce the amount of energy input (by using sensor-based light, recycled paper, paperless official work [online], eco-friendly material etc.) into the system without negatively affecting the output. It was proven with energy audit minimum 15%-20% energy savings is possible which not only save electricity but also reduce the electricity bills. This indicator is introduced to encourage monitoring of electricity usage and

reduction of energy wastage.

Evaluation mechanism Marks
